USING A PRESET DESIGN THEME

How do I use a preset design theme across all of my website pages?

- Go to the **Control Bar** across the top of the page. Click the **Palette** icon next to the **Save** icon. This will open the **Site Theme Manager**.
- In the **Site Theme Manager**, you will see multiple preset themes. Select which one you would like to use across your pages. Then click **Save**.
- If you'd like to select a different preset theme, repeat the process until you find one of the color themes you would like to use.

Important to note

- If you want one of your site's pages to have a different theme, go to the page, click the element you wish to edit (font, background, menu) and click the **Block Styling** icon to make edits to that particular page.
- Changing the font, background, and menu settings in the **Toolbox Pane** will overwrite the settings in the **Site Theme Manager**. Leaving the font, background, and menu settings as "blank" or "none" in the **Toolbox Pane** will enable the **Site Theme Manager** settings.
